Responsive Portfolio Final Draft Checklist

Please ensure your final portfolio meets the following criteria. **Final portfolios and reflections are due Thursday, 4/6 by 11:00pm**. See assignment page for reflection prompts.

Your HTML5 page must:

☐ Use the template that was provided;
☐ Be coded using Clean Coding techniques;
☐ Have an appropriate and meaningful title within the <title></title> tags;
☐ Include stylesheet and Google Font code in the appropriate place in the <head></head> area;
☐ Have your name within <h1></h1> tags;
☐ Be coded using the following HTML5 tags: <section></section>, <header></header>, <figure></figure> in the correct places;
☐ Include a meaningful personal statement based on your Why, How, What statements that articulates **your beliefs about your future field or the content of your site if not using it for a future field**;
☐ Include *at least* two portfolio items, positioned side-by-side using a <section class=" "> structure;
☐ Have all closing </section> and </div> tags followed by an appropriate comment that describes the division that is closing, such as <!-- end left -->;
☐ Include <div class="clear"></div> after the last floated element in each row;
☐ Include accessibility features, such as ALT and TITLE elements on images, and TITLE on links;
☐ Validate against the W3C Markup Validation Service (use Web Developer Toolbar).

Your CSS file must:

☐ Use the template that was provided;
☐ Be coded using Clean Coding techniques;
☐ Have a meaningful .css file name in all lowercase letters;
☐ All structural element widths must be in percentages, not pixels (padding, margins, and borders can be pixels);
    o Pixels *can* be used when styling your computer screen body with a max-width;
☐ Have all font sizes coded as ems;
☐ Include commented math equations, such as /* 36 / 16 */, for all font sizes;
☐ Have all fonts be from GoogleFonts (unless you have requested permission to use AdobeFonts);
☐ Include box-sizing code in the main section of main.css;
☐ Include media queries for specific layouts for cell phones (320px), tablets (768px), and computer screens (1024px);
    o at the 1024px width, the portfolio items must appear side-by-side using the float property;
    o **each screen must have specific styles, even if they are minor changes**;
☐ Reduce code redundancy be putting all global styles in the main section, leaving the media queries for screen-specific codes;
☐ Validate against the W3C CSS Validation Service (use Web Developer Toolbar).

Generally, please ensure:

☐ All files are in the correct folders on your server (such as, images in the images folder, css in the styles folder);
☐ All filenames, including image files, are meaningful, lowercase, and without spaces;
☐ **You have completed, linked to, and uploaded the required reflections in a new HTML file called reflections.html (see assignment page for specifics)**
