Responsive Portfolio Rough Draft 1 Checklist

Ensure your portfolio meets the following criteria **prior to the start of your Week 9 or 10 conference**.

Design features and content should be informed by your Design Persona and Emotional Design Notes.

In addition, please come to your conference with up to 3 questions you have about your portfolio. These questions can be about the aesthetic, the layout, the coding, and/or the content.

Your HTML5 page must:

- ☐ Use the template that was provided;
- ☐ Be coded correctly, using the correct tags in the correct places;
- ☐ Be coded using the following HTML5 tags: <section></section>, <header></header>, <figure></figure> in the correct places;
- ☐ Be coded using Clean Coding techniques;
- ☐ Have an appropriate and meaningful title within the <title></title> tags;
- ☐ Include stylesheet and Google Font code in the appropriate place in the <head></head> area;
- ☐ Have your name within <h1></h1> tags;
- ☐ Include a meaningful personal statement based on your Why, How, What statements, which articulates your beliefs about your future field;
- ☐ Include *at least* two portfolio items, positioned side-by-side using a <section class=" "> structure;
- ☐ For all sections with a class, the closing section tags </section> tags should be followed by an appropriate comment that describes the section that is closing, such as <!-- end left -->;
- ☐ Include accessibility features, such as `ALT` and `TITLE` elements on images and `TITLE` on links.

Your CSS file must:

- ☐ Use the template that was provided;
- ☐ Have a meaningful .css file name in all lowercase letters;
- ☐ All structural element widths must be in percentages, not pixels (padding, margins, and borders can be pixels);
- ☐ Have all font sizes coded as ems;
- ☐ Include commented math equations, such as /* 36 / 16 */, for all font em sizes;
- ☐ Have font and other element colors styled using your design persona;
- ☐ Have all font styled using GoogleFonts;
- ☐ Have all code, except for the box-sizing code, placed within the computer screen media query.

Generally, please ensure:

- ☐ All files are in the correct folders on your server (such as, images in the images folder, css in the styles folder);
- ☐ All filenames are meaningful, lowercase, and without spaces.
- ☐ All file extensions are lowercase (for example, .jpg not .JPG)
- ☐ Your public_html server space is free from clutter (delete unused files, files in the wrong folders, etc.)
